

ISO 27001 Gap & Risk Assessment Report

Executive Summary

Overall Gap Maturity: 72% (Moderate)
Overall Risk Exposure: 48% (Medium Risk)
Total Gaps Identified: 18 | High Risks: 5

Gap Assessment Summary

Clause	Requirement	Gap Status	Score
4.1	Context understanding	Critical Gap	1
5.2	Security policy	Partial Gap	3
6.1	Risk assessment	Major Gap	2
7.2	Training	Minor Gap	4
8.1	Operations	No Gap	5

Risk Register

Clause	Threat	Likelihood	Impact	Score	Level
4.1	Unidentified risks	4	3	12	Medium
6.1	Weak risk process	5	4	20	Critical
7.2	Human error	3	3	9	Medium
8.1	Operational failure	2	4	8	Medium

Logic Behind the Implementation

1. Gap Assessment Logic

Each response is mapped to a maturity score from 1 to 5. A higher score indicates better compliance. Maturity Percentage is calculated as $(\text{Total Score} \div 250) \times 100$.

Prompt Used:

You are an ISO 27001 compliance consultant. Analyze the answer, identify the gap, explain what is missing, and the associated risk.

2. Risk Analysis Logic

Risk is calculated using $\text{Likelihood} \times \text{Impact}$ (1–5 scale each). Maximum per question is 25. Total risk percentage is $(\text{Total} \div 1250) \times 100$.

Prompt Used:

You are an ISO 27001 risk analyst. Identify threat, vulnerability, likelihood, impact, risk score and risk level.

3. Improvement Suggestions Logic

For each gap and risk, actions are suggested in three stages: immediate, short-term, and long-term.

4. Visualization Logic

Pie charts represent gap distribution, bar charts show maturity scores, and heatmaps display risk levels based on likelihood and impact.

Conclusion

This implementation transforms audit answers into measurable insights, risks, and actionable improvements, delivered in a structured report.
